Bachelor of science in computer science	62%
Andhra University, Visakhapatnam, Andhra Pradesh	2018- 2023

SKILLS

Frontend Technologies : HTML, CSS JavaScript	Backend Technologies : Node.js, Express.js,
Databases : MongoDB, MySQL	Frameworks/Libraries : React.js/ Bootstrap/ Tailwind CSS
Version Control : GIT/GITHUB	Tools & Platforms : VS Code, Postman, npm
Others: Problem Solving, Debugging, API Integration	

PROJECTS

DocMeet Application : MERN Stack -

- A doctor appointment booking application where users can book appointments and manage schedules with ease.
- Implemented doctor selection and filtering through a simple list-based interface using JavaScript and MongoDB queries .
- Developed appointment booking system allowing users to select date and time slots, using React forms and backend scheduling logic with Express and MongoDB.
- Created user registration and login functionality for secure access to appointment history, using JWT authentication and bcrypt for password security.
- Improved user experience by integrating real-time form validation and success alerts, using React state handling and toast notifications.

PrimeNest Application : React.js -

- A Real Estate Website developed using React that allows users to explore property listings and view building images through a clean, static interface
- Implemented an image gallery to showcase building and property visuals using responsive React components and Tailwind CSS for styling
- Built a structured layout to display property details clearly, focusing on user-friendly design and static content delivery.
- Added a contact form allowing users to submit their details for inquiries, implemented with controlled React form components and optional local storage handling.
- Enhanced user experience by adding responsive design and dark mode support, using React state toggling and Tailwind CSS utility classes

Vybbii— Application :HTML,CSS,JAVASCRIPT,FIREBASE-

- A digital music streaming platform built with HTML, CSS, and JavaScript, allowing users to search, play, pause, skip tracks, and manage playlists through an intuitive interface.
- Implements Firebase Authentication for secure login and signup, providing personalized access and user-specific playlist management.
- Delivers a seamless playback experience with real-time controls, responsive layout, and smooth navigation across devices.
